HELLOFRESH DATA ANALYSIS

INTRODUCTION

HelloFresh is a meal delivery service that provides customers with pre-portioned ingredients and recipes to cook meals at home. The company was founded in 2011 in Berlin, Germany, and has since expanded to various countries around the world including the United States, Canada, Australia, and many European countries. HelloFresh offers a variety of meal plans, including options for carnivores, vegetarians, and families, as well as options for different dietary needs such as low-carb, gluten-free, and more. Customers can choose from a variety of recipes each week and can easily skip or cancel their subscriptions which are designed to be fresh and of high quality. HelloFresh's mission is to make home cooking easy and accessible and to provide customers with the tools they need to create delicious, healthy meals at home

SUBSCRIBERS OVER THE YEARS

One of the key factors from which we can find out how well HelloFresh is doing is the number of subscribers over the period. From this visual one thing is sure the trend is positive from 2018 to 2022.

Since the first quarter of 2018, the number of subscribers were increasing but a huge increment happened between Q4 2020 and Q1 2021 during the pandemic period.

But now the area of concern is Q2-Q3 of 2022 where the number is rapidly decreasing. After reading a few pieces of feedback, I believe the reason behind that are options are too expensive, complaints about the application, auto deduction, and many more.

FLUCTUATIONS IN ORDER PER CUSTOMER

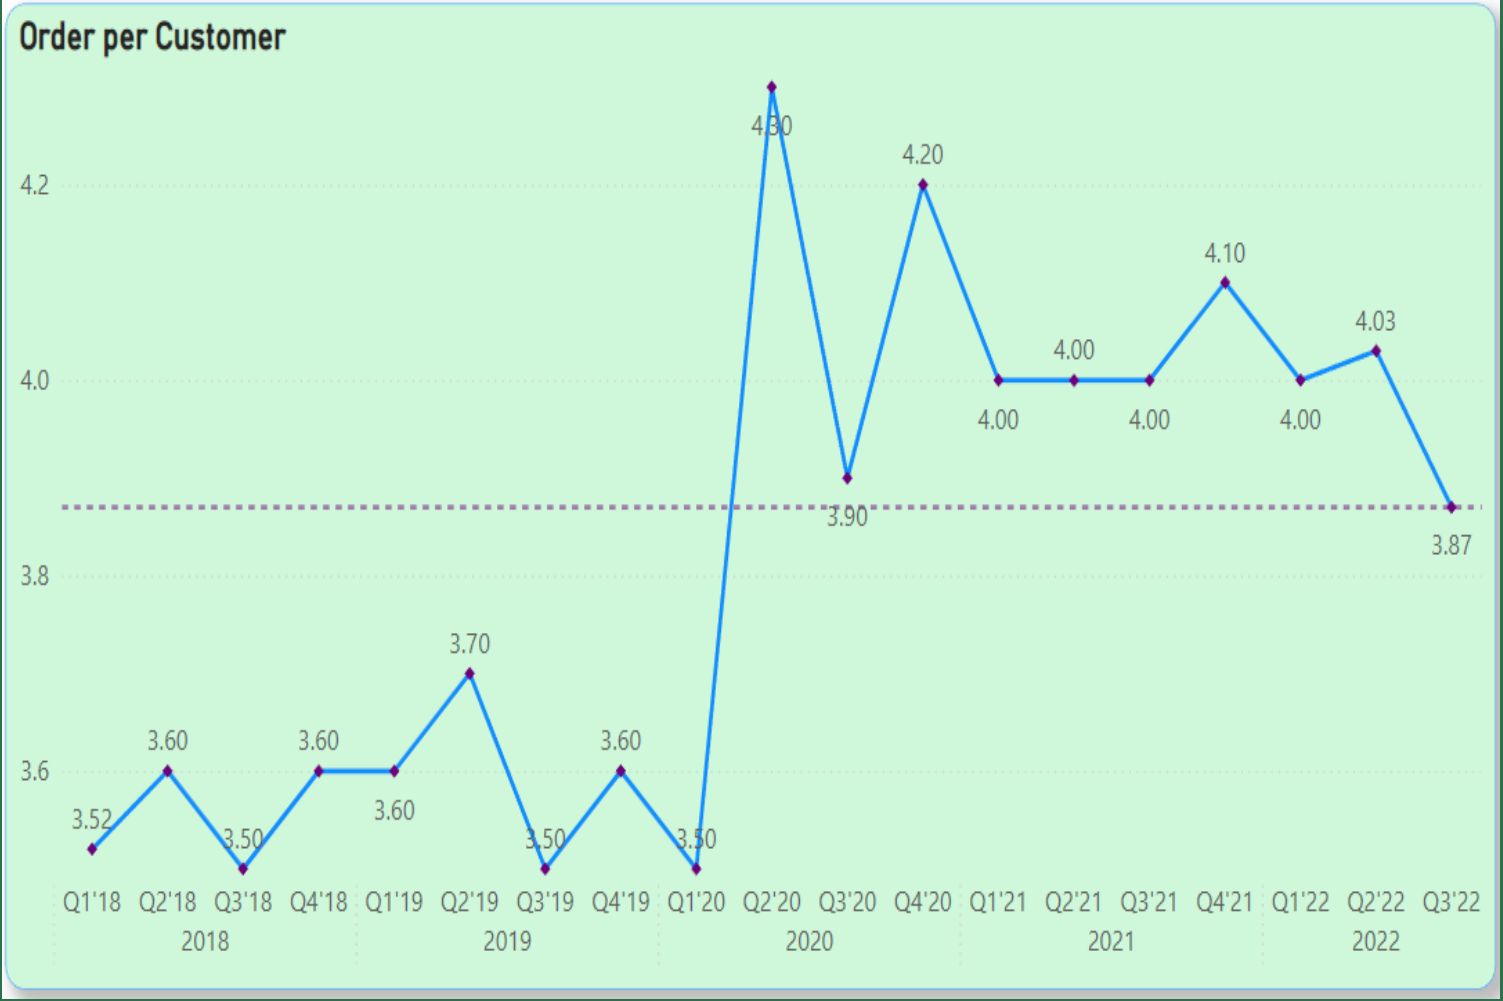
This particular visualization I showing how many orders per customer throughout the years.

We can divide this visualization into 2 parts. One is below average and the other one is above average.

There is a huge increase in orders after Q1 o 2020. The possible reason can be at this this period pandemic was going at its peak.

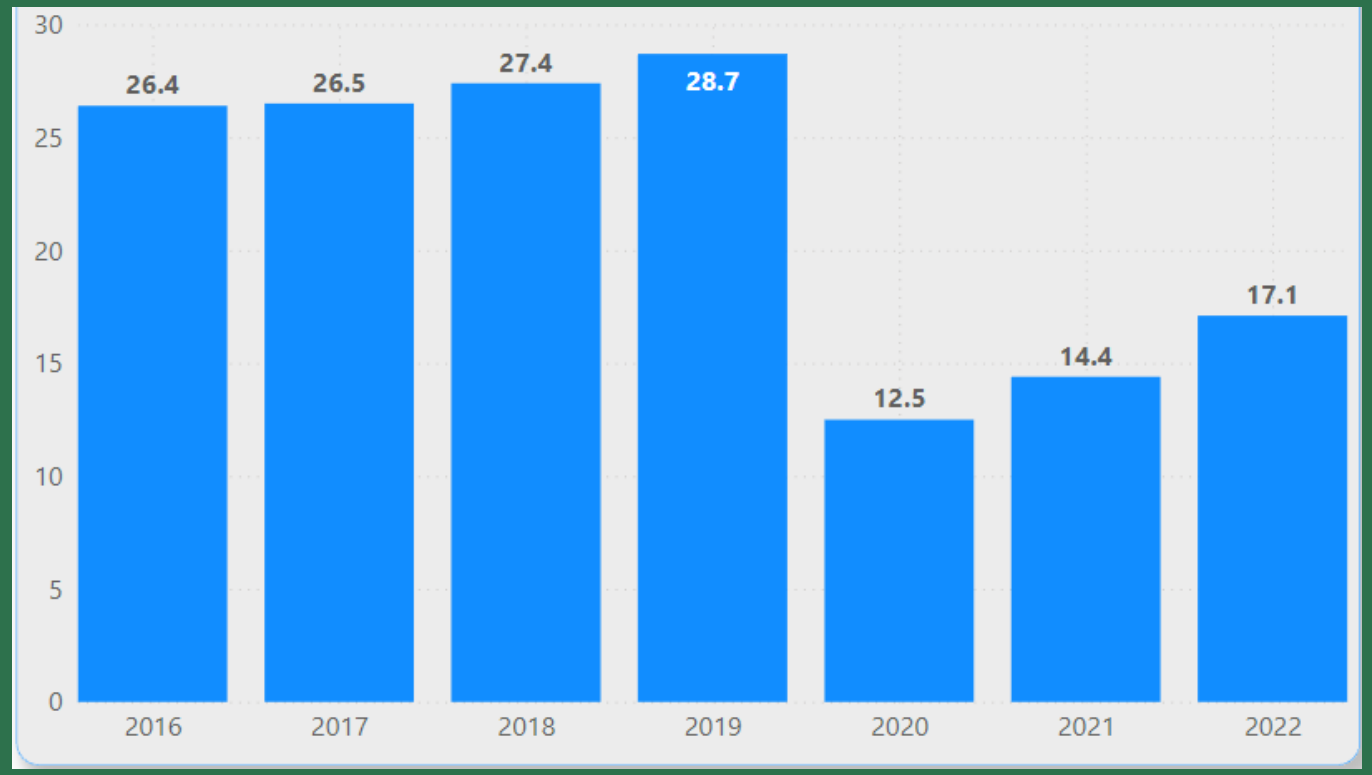
From last quarter, it can be observed that the number is going down towards the average reference line.

One more interesting thing I noticed is that almost a year between Q2 and Q3, numbers went down. This could be a seasonal effect.



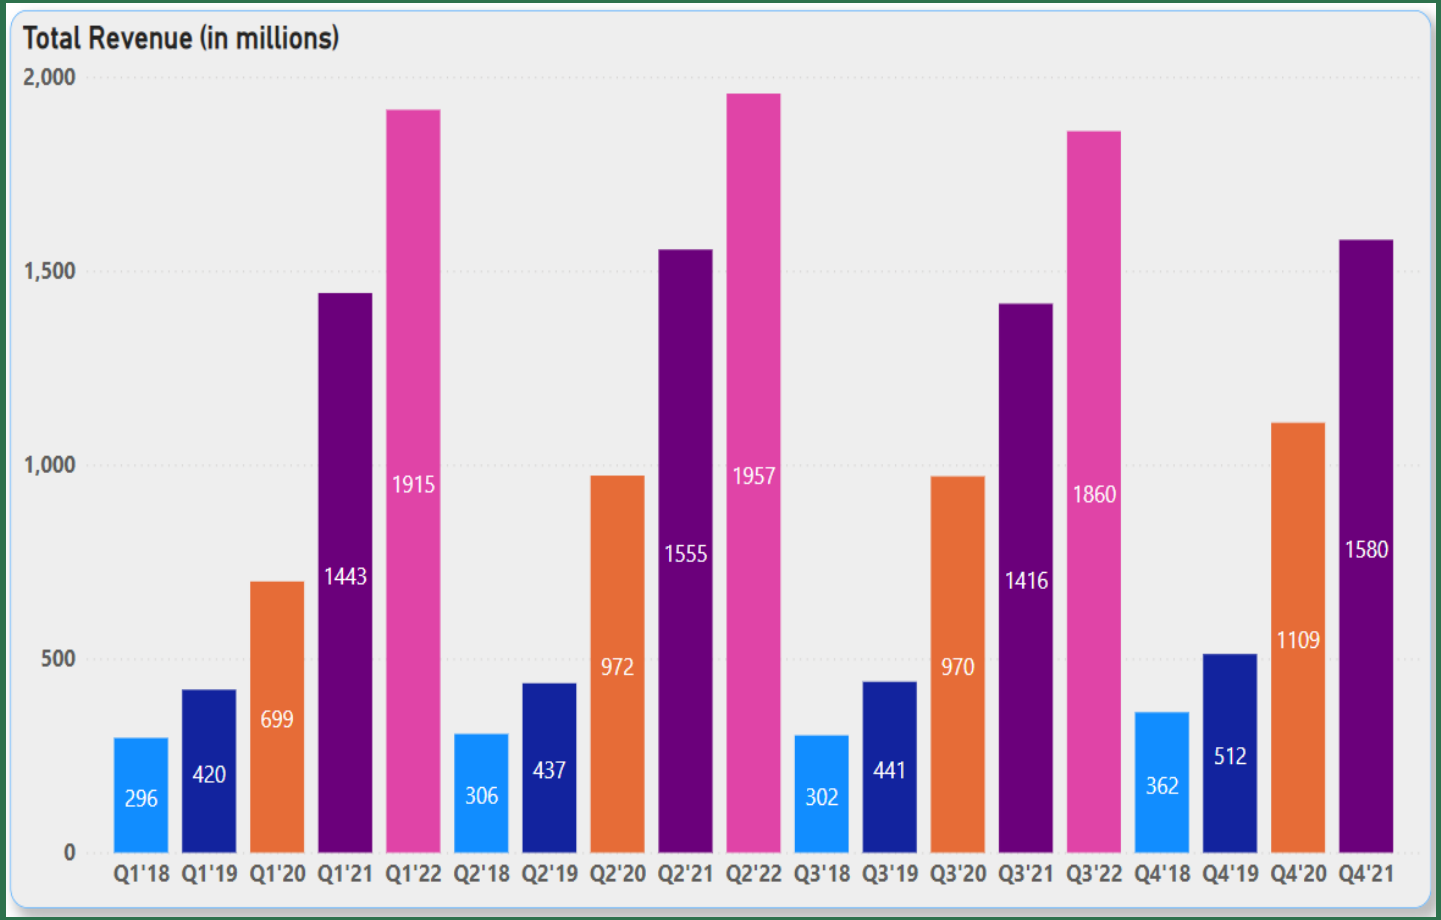
MARKET EXPENSES DISTRIBUTION

- One thing we can notice here is that at the end of 2019 when the pandemic was in its early stage, HelloFresh was doing a huge percentage of revenue on market expenses every year. But then a huge decrease in 2020 happened.
- HelloFresh kept spending on market expenses positively but not in large amounts.



TOTAL REVENUE COMPARISON (QUARTERLY)

- From here we can notice why HelloFresh is one of the fastest-growing companies in the world.
- We can see the comparison between the data of every quarter of each year. The revenue is positively increasing.
- There is no quarter where revenue is less than the previous year's quarter even when the subscribers and orders were down.



CHANGES IN SUBSCRIBER NUMBERS & REVENUE IN ALL QUARTERS

Here I created a table which consisted total subscribers, percentage change in each quarter, total revenue, and percentage change of revenue.

Let's first concentrate on the percentage change in subscribers. The highest percentage change in a positive direction came in Q1 of 2020. This was the period when the pandemic started getting intense.

But the area of concern is last 2 quarters of 2022. In both quarters subscriber numbers went down about 6.50%.

One more thing need to notice that in past it never went down in 2 consecutive quarters.

Now let's look at revenue. It looks like quite good I we just see the total revenue column but I we see at revenue change there are 4 quarters where revenue was in negative.

One more interesting thing that in 2022 Q2 subscriber numbers went down but revenue is still in positive figure. That possible because of the higher price.

Year	Quarter	Total_Subs	Subs_change (%)	total revenue	Rev_Change (%)
2018	Q1'18	1.88	0.00	295.60	0.00
2018	Q2'18	1.84	-2.17	306.00	3.40
2018	Q3'18	1.84	0.00	302.20	-1.26
2018	Q4'18	2.04	9.80	361.70	16.45
2019	Q1'19	2.48	17.74	420.10	13.90
2019	Q2'19	2.41	-2.90	436.70	3.80
2019	Q3'19	2.61	7.66	440.60	0.89
2019	Q4'19	2.97	12.12	511.80	13.91
2020	Q1'20	4.18	28.95	699.10	26.79
2020	Q2'20	4.18	0.00	972.10	28.08
2020	Q3'20	5.00	16.40	970.20	-0.20
2020	Q4'20	5.29	5.48	1,108.50	12.48
2021	Q1'21	7.28	27.34	1,442.90	23.18
2021	Q2'21	7.68	5.21	1,555.00	7.21
2021	Q3'21	6.94	-10.66	1,415.50	-9.86
2021	Q4'21	7.22	3.88	1,580.10	10.42
2022	Q1'22	8.52	15.26	1,915.40	17.51
2022	Q2'22	8.00	-6.50	1,957.10	2.13
2022	Q3'22	7.51	-6.52	1,860.20	-5.21

COUNTRIES OF OPERATION

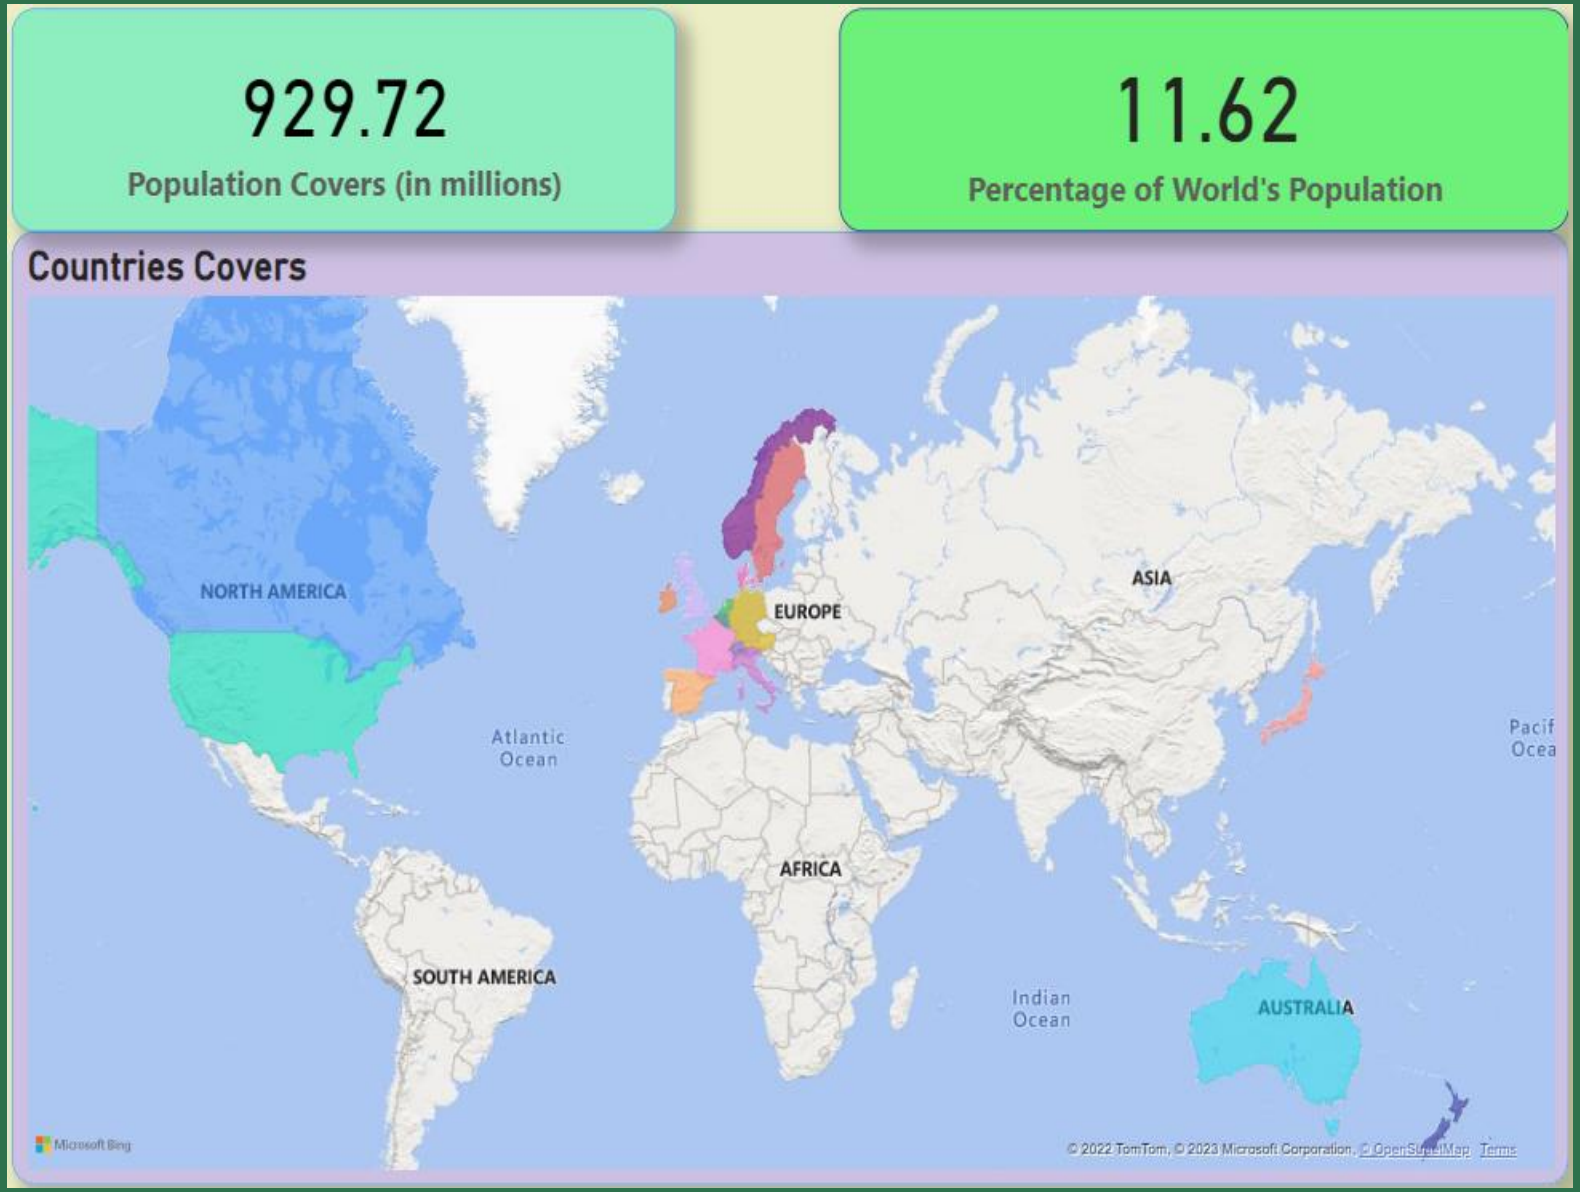
This is a map chart where I tried to show in what part of the world HelloFresh is operating.

There are currently 19 countries and more than 900 million people in those countries which HelloFresh covers.

This is more than 11% of the world's population which means HelloFresh has a huge market.

But one thing that surprised me is HelloFresh in Asia. Here it is in Japan only. However, HelloFresh can target the world's largest market which is India with more than 1400 million people.

Also, I'm noticing that there are still a lot of countries in Europe like Portugal, Finland, and Poland where HelloFresh is not operating currently.



SUMMARY

The overall impression of HelloFresh is really impressive. This company does some extraordinary work in the food industry like helping poor people with food, and innovative ways to deliver a measured amount of raw ingredients to prevent wastage during cooking.

If we take a look over the overall performance in the last 12 years the number of subscribers keeps increasing except in the last 2 quarters, revenue is in positive figure with the impressive figure, and operating in 19 countries.

However, a few areas of concern need to be highlighted. I read a lot of feedback from HelloFresh consumers all over the globe and they mentioned some serious issues:

They feel that the price of one meal is too expensive even for some restaurants' standards.	The veggie options are not much for vegetarians and vegans.	Not enough options for vegetarian protein.	There are many complaints about the application as well.	A few of them said that they aced the auto-deduction issue.

SUGGESTIONS

In the end, I have a few suggestions for HelloFresh as I want that this company grows more.

Try to make the orders more budget-friendly for the consumers. This company can access more people. Many people want healthy and fresh food at home in their budget.

Include more veggie options in meals because nowadays people prefer it more. One option can be to try to change veggies every week, so people can attract more. This can be beneficial.

Include vegetarian protein as well for example Lentils or Paneer etc. As there are many vegetarians and vegans available in the market who look for these options. Especially if HelloFresh is thinking about coming to India then this is a great option.

Try to make the application more user-friendly. I possibly get some feedback from people randomly and use A/B testing to find out its effect.

Also, can add an instant payment option as well without a subscription. As the competition is tough in the market with an opponent like Uber Eats, Doordash, Wolt, etc.

In the end, I just want to mention a few companies that are in India that can be future competitors for HelloFresh Swiggy, Zomato, Uber Eats, and Eat Fit. Eat Fit is quite the same as HelloFresh, they provide delicious but healthy meals.

THANK YOU
